

POWER ANALYZER UMG 512-PRO

Item No.: 422.144; 422.145

DESCRIPTION OF FUNCTIONS

The class A (IEC 61000-4-30) power analyzer UMG 512-PRO is used for the measurement and calculation of electrical variables such as voltage, current, power, energy, harmonics (up to the 63rd order) etc. in electrical installations.

The measurement results can be displayed, stored, read out and further processed via the device's interfaces.

Thanks to the internal memory, the UMG 512-PRO can also be used as a transient recorder and event recorder (voltage swells, dips, interruptions).

- 422.144 UMG 512-PRO (230 V AC)
- 422.145 UMG 512-PRO (24 V DC)
