

FIMP-XL-8XSC/SC-D/°-PC SB9-SM

8-PORT SPLICE BOX

SINGLEMODE (SM)

Item No.: 422.432

Actual product may vary

DESCRIPTIONS OF FUNCTIONS

The 8-port splice box (or patch panel) is the ideal solution for the transfer point of the fiber optic field wiring. The box is fully fitted with the components needed: splice tray, couplings, pigtails and cable gland. Because of the compact and robust design, it is ideally suited for industrial environments.

TECHNICAL DATA

FX Ports	
Number	8
Connector	SC
Optical fiber	Singlemode
Optical fiber type	9/125 μm
Cable entries	Cable gland M20 (for cable with max. 13.8 mm outer diameter)
Insertion loss	≤ 0.2 dB/km
Dimensions (H x W x D):	138 x 72 x 128 mm
Mounting:	DIN rail
Operation temperature:	-40 ... 75 °C
Humidity:	10 ... 95 % RHD, non-condensing
Weight:	860 g
Housing:	Stainless steel, powder coated
Protection class:	IP20
