

# UNIVERSAL SENSOR HOLDER (IRRADIATION)

Item No.: 423.455

## DESCRIPTION OF FUNKTIONS

The universal sensor holder was specifically designed for the mounting of irradiation sensors close to the modules of the photovoltaic systems. So the irradiation is measured directly at the modules. The first mounting surface of the sensor rack is mounted in the same tilt as the photovoltaic modules itself and this is ideally suited for the installation of sensors to measure the irradiation at the module level. The second mounting surface is in the tilt adjustable for horizontal mounting of pyranometers. The universal sensor rack is designed for the installation of up to 2 pyranometers and up to 4 irradiation sensors.

## SUITABLE FOR

Pyranometer:

SMP10 (Item No.: 423.034)  
SMP11 (Item No.: 423.029)  
CMP11 (Item No.: 423.024)  
SR20-D1 (Item No.: 423.031)  
SR20-TR (Item No.: 423.033)

Irradiation sensors::

SI-12TC (Item No.: 423.000 / 423.002 / 423.004)  
SI-12TC-T (Item No.: 423.001 / 423.003 / 423.005)  
SI-420TC (Item No.: 423.010)  
SI-420TC-T (Item No.: 423.011 / 423.012)  
SI-RS485-TC-T (Item No.: 423.015)  
SI-RS485-TC-T V2 (Item No.: 423.016)

## TECHNICAL DATA

Length:

0,6 m

Weight:

2,57 kg

Material:

Stainless steel

## SCOPE OF DELIVERY

Universal sensor holder  
Mounting material

meteocontrol GmbH | Spicherer Straße 48 | 86157 Augsburg | Germany | Telephone +49 (0)821 34666 - 0 | Fax +49 (0)821 34666 - 11
