

TRAVERSE FOR COMPACT WIND SENSORS

Item No.: 423.443

DESCRIPTION OF FUNCTIONS

The traverse for Compact wind sensors is used to install a Compact series wind direction sensor and wind speed sensor together. The ability to mount both sensors on one traverse reduces the space requirement and installation work. Due to the light aluminium design, the element hardly puts any weight on the mast in addition and is perfectly suitable for use outdoors.

SUITABLE FOR:

Masts or pole.
Diameter

48mm – 102mm Ø

TECHNICAL DATA:

Sensor distance:
Material traverse:
Assembly set:
Weight:

0.8m
Aluminium (AlMgSi0,5)
stainless steel (V2A)
0.3kg
